Security and Society

A transdisciplinary research initiative at the University of Freiburg (Germany)

Is total surveillance an answer to new security demands?

How will total information awareness influence our ethical feeling?

What are side effects on labour law?

Abuse of penal law to control ethical misbehaviour.

Policital decisions and digital ignorance – case studies.

Behaviour of humans in emergencies.
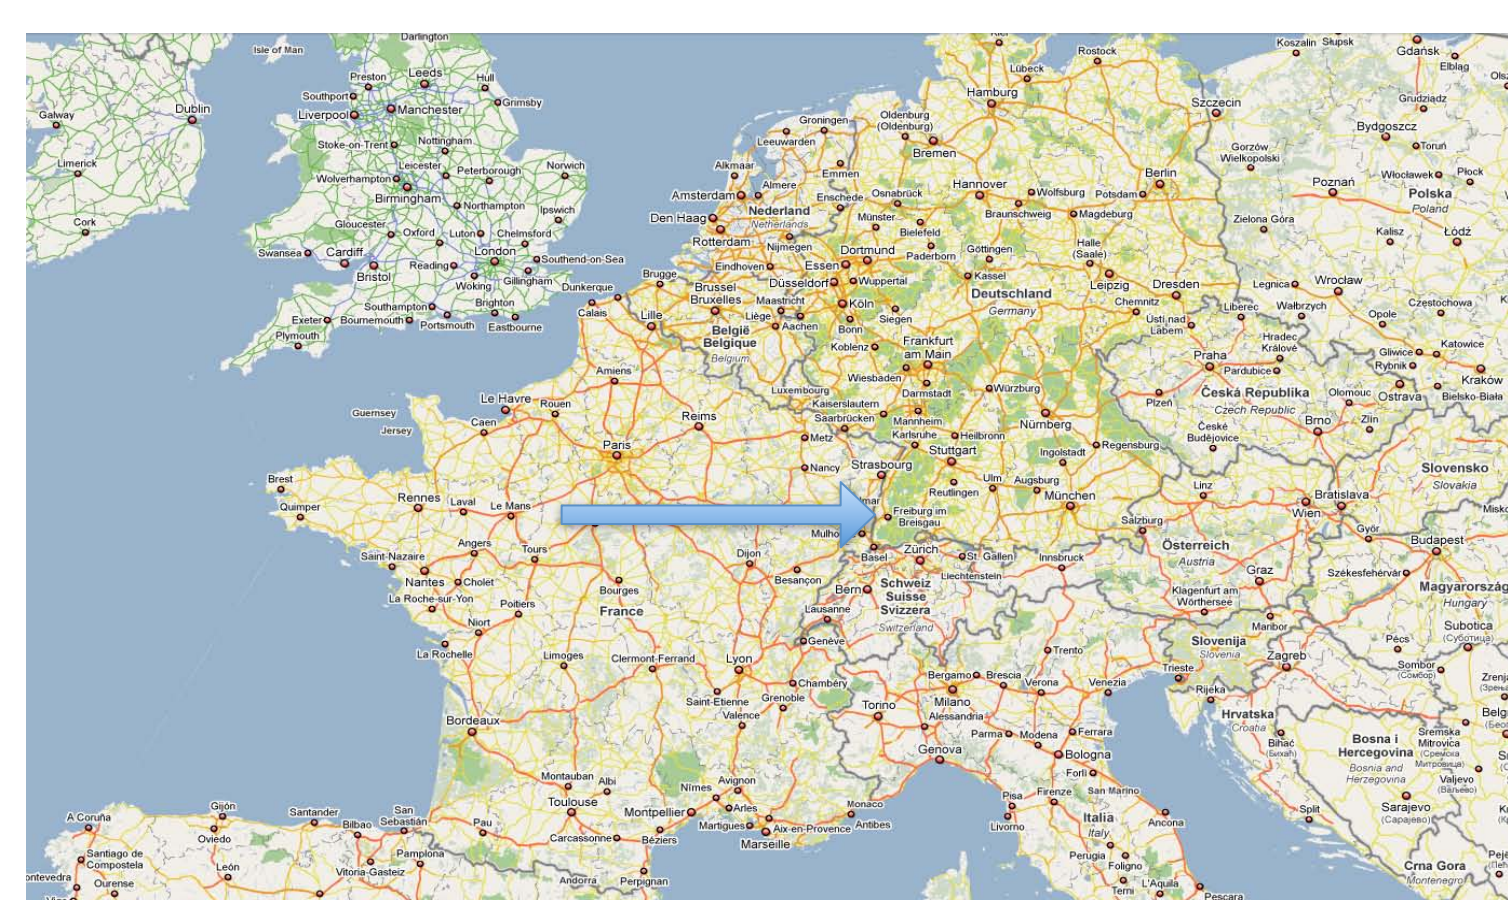

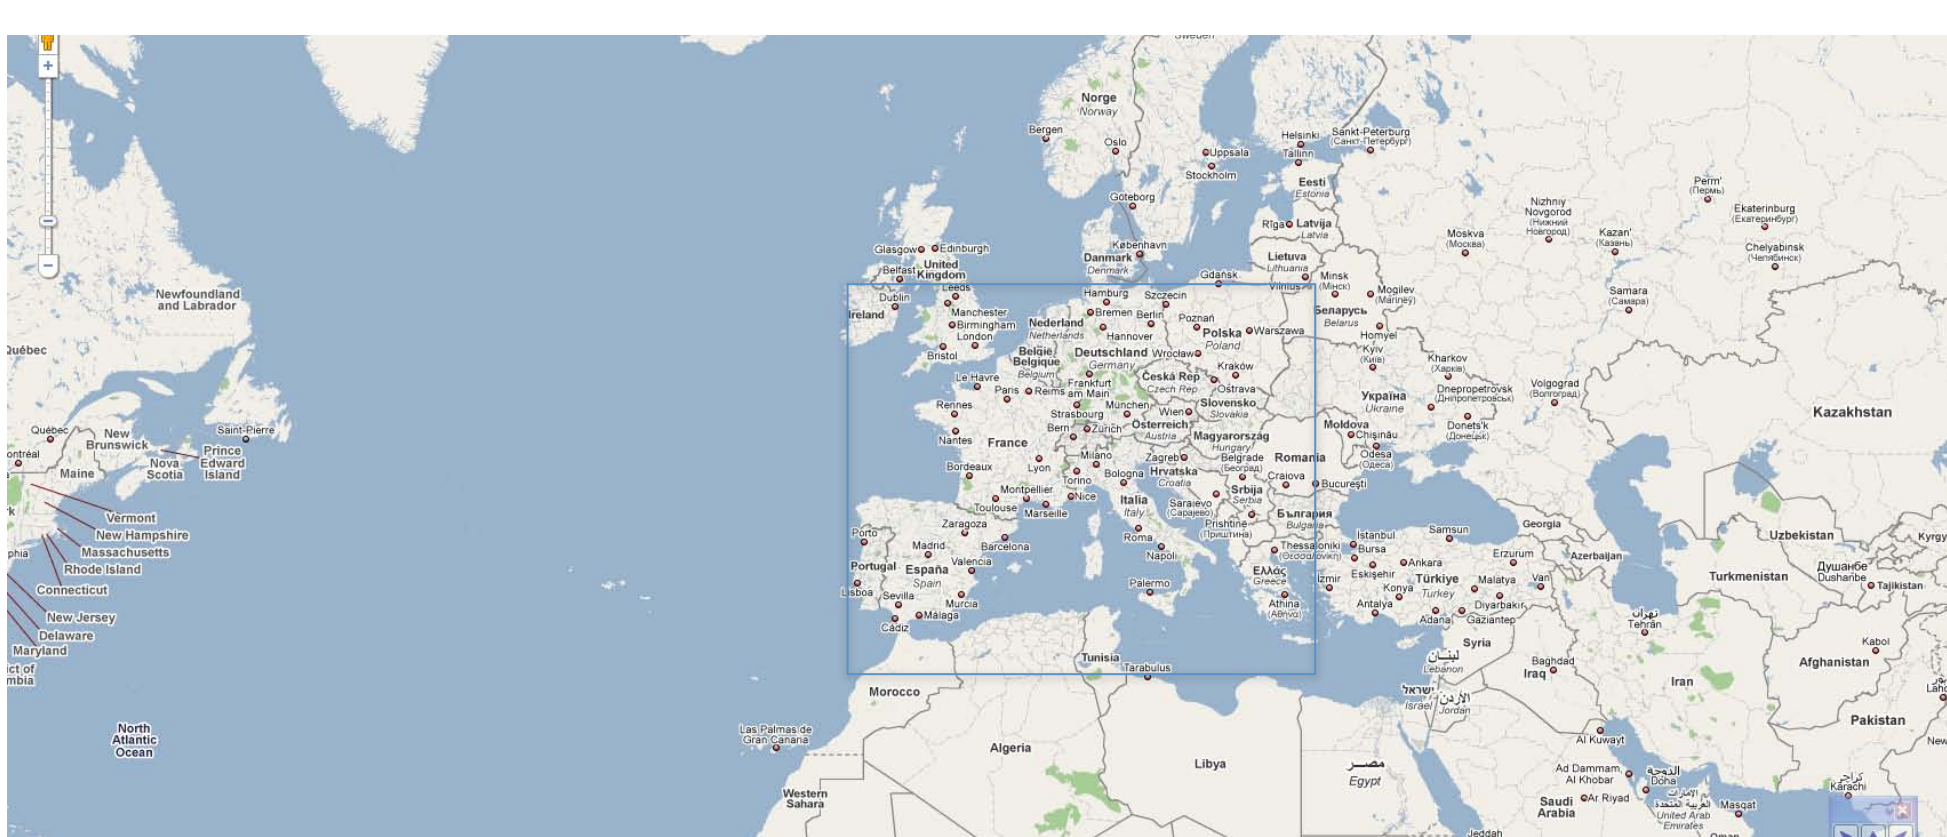

Will correlation of innocent data leave us innocent?

Will national legislation provide any protection at all?

Should a state provide anonymity to protect its citizens from friends

Digital stealth mode – do we really need the type of data which we collect?
